专业技能

技术栈

Vibe Coding, Power BI, DAX, SQL, VBA, Figma, SVG, HTML/CSS

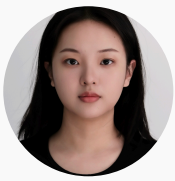
证书

初级会计, 证券从业资格

语言

中文, 英语（CET-6）

个人简介



擅长将原始数据转化为可执行的商业洞察，以数据建模与可视化驱动业务决策。善用 AI 工具快速拓展认知边界，面对陌生领域亦能高效上手、精准交付。

工作经历

2024.10 - 至今

上海翌可信息技术有限公司

数据分析师

主导 BI 项目全流程交付：对接甲方业务团队梳理需求，基于需求文档在 Figma 中完成原型设计并经客户确认后启动开发。独立处理线下数据源（Excel/CSV），同时与数据团队协作完成数据仓库对接，输出 ADS 表结构设计。负责 UAT 测试与数据校验，与业务团队完成对数确认，项目交付后对终端用户进行培训，涵盖报表使用及数据维护。

2022.06 - 2022.12

奇瑞新能源汽车股份有限公司

投资助理

参与多项战略合作项目的落地推进，涵盖国内战略联盟合作及国际商务合作协议研究。工作职责包括行业案例分析、尽职调查、投资可行性建议及对外合作材料撰写，协助领导评估新能源品牌的市场定位与竞争格局，为战略决策提供数据与分析支撑。

项目经历

精选项目 A

香奈儿
2025.9-2026.2

精品店销售运营追踪系统

项目描述：
基于乙方提供的 Chanel 中国区精品店销售运营追踪系统需求文档（PRD）及 Excel 原型设计，为品牌构建区域销售运营追踪报告。作为丙方负责 BI 开发和 SSAS 多维数据集设计，按照 Excel 原型 1:1 高还原度开发，实现了 Summary（汇总）、BTQ Rank（精品店排名）、Performance（业绩表现）、Best Seller（畅销品）、FJA Performance 等多个分析模块，支持 YTD/Month/Self-Define 多时间维度切换，涵盖销售额、客流量、转化率、客单价、渗透率等核心零售指标，并实现年初至今达成率（Achieve）和运行率（Run Rate）追踪分析。

工作职责：
- 对接乙方项目团队，严格按照 PRD 需求文档和 Excel 原型进行开发
- 负责 SSAS 多维数据集设计与数据建模工作
- 负责数据建模与 DAX 指标开发，验证数据逻辑和准确性
- 1:1 高还原度复刻 Excel 原型，实现网页端 / C 端设计风格的可视化效果
- 实现行级别权限控制（RLS），确保不同区域 / 门店数据隔离

精选项目 B

利洁时
2025.12-2026.3

SCM 7R 供应链管理

项目描述：
基于7R供应链理论框架，为甲方企业构建的企业运营管理驾驶舱。与财务/销售运营视角不同，本项目从供应链视角俯瞰企业全局运营情况，涵盖出货管理、库存管控、订单满足率(PFR)、质量投诉、营运成本等核心模块的27页交互式报表。

工作职责：
- 深度对接甲方业务团队与IT团队，梳理需求并转化为数据指标体系
- 根据原始需求文档设计Figma原型，与甲方确认后再进行开发
- 负责数据建模与DAX指标开发，验证数据逻辑 and 准确性
- 运用HTML/SVG开发自定义视觉对象，实现复杂可视化效果
- 实现多层级权限管理，确保不同级别用户看到对应数据

快消 | 供应链管理 | 7R理论 | Power BI | Figma | HTML | SVG

精选项目 C

飞利浦
2025.7-2025.9

成本管理报表系统

项目描述：
基于甲方SAP财务系统数据，为甲方企业构建的企业成本分析报表。从财报视角分析企业成本结构，支持业务成本(BF)与职能部门成本(EF)两大视角分析，并支持多汇率切换（历史汇率vs当前汇率）、多预测版本切换、预算vs实际对比、YoY对比等维度。

工作职责：
- 深度对接甲方财务团队与IT团队，梳理需求并转化为数据指标体系
- 根据原始需求文档设计Figma原型，与甲方确认后再进行开发
- 为IT团队设计并提供指定的数据结构和调整要求
- 负责数据建模与DAX指标开发，验证数据逻辑和准确性
- 将本地数据源迁移至SharePoint取数并进行ETL处理
- 实现行级别权限控制和页面级权限控制

快消 | 工厂 | 财务 | 成本报表 | Power Query | Power BI | Figma | Sharepoint

项目经历

精选项目 D

圣戈班

2025.4-2025.11

人才战略分析平台

项目描述：

基于甲方 Workday HR 系统与 Excel 数据源构建的人才战略分析平台。从 HR 管理视角分析企业人才结构，涵盖员工档案、能力评估、人才九宫格（9-Box Grid）、360° 反馈、继任计划、绩效趋势、ROI 分析等核心模块，支持按组织架构、人员级别等多维度筛选分析。

工作职责：

- 深度对接甲方 HR 业务团队与 IT 团队，梳理数据源情况和业务需求
- 根据原始需求文档设计 Figma 原型，与甲方确认后再进行开发
- 通过 PQ 批处理数据源
- 负责数据建模与 DAX 指标开发，验证数据逻辑和准确性
- 用 Python 开发自动裁剪工具，将非规则尺寸的照片批处理成规则头像，并在 BI 中动态展示
- 运用 HTML/CSS/SVG 开发自定义视觉对象，实现人才九宫格、雷达图等一般情况下无法在 BI 中实现的可视化效果
- 实现非规则行级别权限控制，确保不同角色数据隔离

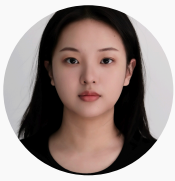
Profile



Translating raw data into actionable business insights through robust modeling and compelling visualization. AI-empowered fast learner who delivers results in unfamiliar domains with speed and precision.

Work Experience

2024.10 - PRESENT

Shanghai Exadata Information Technology Co.,Ltd

Data Analyst

Led end-to-end BI project delivery: gathered requirements from client business teams, designed interactive prototypes in Figma for stakeholder sign-off, and developed dashboards upon approval. Managed data pipelines independently for offline sources (Excel/CSV) and partnered with data engineering teams on warehouse integrations, defining ADS table structures. Owned UAT processes — performed data validation, reconciled figures with business teams, and delivered post-launch user training on report usage and data maintenance.

2022.06 - 2022.12

Chery New Energy Automobile Technology Co., Ltd.

Investment Assistant

Supported the execution of multiple strategic partnership projects, spanning domestic strategic alliances and international business cooperation. Responsibilities included industry case analysis, due diligence, investment feasibility assessments, and drafting external cooperation materials — assisting leadership in evaluating market positioning and competitive landscape for a confidential new EV brand launch.

Project Experience

Featured Project A

Client: Chanel
2025.9-2026.2

Boutique Sales Operations Tracker

Project Overview:
Built a regional sales operations tracking report for Chanel China, based on PRD documentation and Excel prototype designs provided by the system integrator. Acting as a third-party BI developer responsible for Power BI development and SSAS cube design, delivering a 1:1 high-fidelity replication of the Excel prototype. Implemented multiple analysis modules — Summary, BTQ Rank, Performance, Best Seller, and FJA Performance — with YTD/Month/Self-Define time dimension switching. Covers core retail KPIs including sales revenue, footfall, conversion rate, average transaction value (ATV), and penetration rate, along with YTD achievement rate and run rate tracking.

Responsibilities:
- Coordinated with the system integrator's project team, developing strictly in accordance with the PRD and Excel prototype
- Responsible for SSAS multidimensional cube design and data modeling
- Owned DAX measure development and data validation to ensure logic and accuracy
- Replicated the Excel prototype at 1:1 fidelity, delivering a web/consumer-grade visual design
- Implemented Row-Level Security (RLS) to enforce region- and boutique-level data isolation

Retail | Luxury | Sales & Ops | Power BI | SSAS

Featured Project B

Client: Reckitt
2025.12-2026.3

SCM 7R Supply Chain Management

Project Overview:
An enterprise operations management cockpit built on the 7R supply chain framework. Unlike finance or sales-driven perspectives, this project takes a supply chain lens to oversee end-to-end operations, covering 27 interactive report pages across shipment management, inventory control, product fill rate (PFR), quality complaints, and operational costs.

Responsibilities:
- Engaged deeply with client business and IT teams to gather requirements and translate them into a structured KPI framework
- Designed Figma prototypes based on requirement documents, proceeding to development only after client approval
- Owned data modeling and DAX measure development, validating data logic and accuracy
- Developed custom visuals using HTML/SVG to achieve complex visualization effects
- Implemented multi-level row-level security (RLS) to ensure role-based data access

FMCG | SCM | 7R Framework | Power BI | Figma | HTML | SVG

Project Experience

Featured Project C

Client: Philips
2025.7-2025.9

Cost Management Reporting System

Project Overview:
An enterprise cost analysis reporting system built on the client's SAP financial data. Analyzing cost structures from a financial statement perspective, supporting dual analysis of Business Function (BF) and Executive Function (EF) costs. Features include multi-currency switching (historical vs. current rates), forecast version switching, Budget vs. Actual comparison, and YoY analysis.

Responsibilities:
- Engaged deeply with client finance and IT teams to gather requirements and define a structured KPI framework
- Designed Figma prototypes based on requirement documents, proceeding to development after client approval
- Designed and provided specified data structures and adjustment requirements for the IT team
- Owned data modeling and DAX measure development, ensuring data logic and accuracy
- Migrated local data sources to SharePoint for automated ETL processing
- Implemented Row-Level Security (RLS) and page-level access control

FMCG | Factory | Finance | Cost Statement | Power Query | Power BI | Figma | Sharepoint

Featured Project D

Client: Saint-Gobain
2025.4-2025.11

Talent Strategy Analytics Platform

Project Overview:
A talent strategy analytics platform built on the client's Workday HR system and Excel data sources. Analyzes enterprise talent structure from an HR management perspective, covering core modules including employee profiles, competency assessments, 9-Box Grid, 360° feedback, succession planning, performance trends, and ROI analysis, with multi-dimensional filtering by organizational structure and personnel level.

Responsibilities:
- Engaged deeply with client HR business and IT teams to assess data sources and gather business requirements
- Designed Figma prototypes based on requirement documents, proceeding to development after client approval
- Processed data sources in batch via Power Query (PQ)
- Owned data modeling and DAX measure development, validating data logic and accuracy
- Built an automated photo-cropping tool in Python to batch-process irregular employee photos into standardized avatars, rendered dynamically in the BI report
- Developed custom visuals using HTML/CSS/SVG to achieve visualizations not natively supported in BI, including 9-Box Grid and radar charts
- Implemented non-standard row-level security (RLS) to ensure role-based data isolation
